# INTRODUCTION

The decoration in porcelain has developed enormously on an industrial and semi-industrial level, but at the contemporary craft and artistic level, specialization, practice and perfection are required, avoiding high costs.

The course deals with two techniques with the preparation of engobes and glazes colours and with the possibility of single firing. A creative course that allows you to develop decoration for small series of decorative and utilitarian handicrafts and decoration in the field of contemporary sculpture.

It starts with the creation of samples of objects, passing through drying, preparation of materials, decoration, corrections and firings.
