THE BASIS OF THE REALISATION OF PLASTER MOULDS

INTENSIVE COURSE ON PLASTER MOULDS

20-21-22 MARCH 2027

INCLUDING 20 HOURS OF TEACHING | MATERIALS NEEDED FOR THE COURSE | N. 3 BREAKFASTS

MAXIMUM 9 PARTICIPANTS

TEACHER: MARCO MALAVOLTI

FAENZA ART CERAMIC CENTER

INTRODUCTION

Reproducing a shape for large or small productions, but also creating unique objects from a casting or hand-moulding mould, simplifying the working processes; this is the dream of many ceramists.

Trainer Marco Malavolti will present in an effective, simple and creative way an intensive programme on the basic techniques required to make multi-part casting and pressure moulds.
Participants will work on objects provided by the organisation on which the moulds will be made. The objects are designed to see different complexities and moulding techniques.

The lessons are entirely practical in addition to a theoretical chapter related to techniques and materials and a FAQ (Frequently Asked Questions) session.

PROGRAM

DAY 01

20/03 | 7 hours | 9.00-17.00

Presentation of the course and introduction of the moulding technique;
Preparation of soap (release agent for plaster parts);
Modelling;
Finishing the model;
Making the first mould;

DAY 02

21/03 | 7 hours | 9.00-17.00

Theory on moulds of thick objects;
Construction of a multi-part mould;
Mould theory of round objects;
Construction of a multi-part mould on an all-round object;

DAY 03

22/03 | 7 hours | 9.00-17.00

Completion of a multi-part mould on an object in the round;
Visit to host company.

INFORMATION

The end of the lessons may be subject to changes due to the course programme.
Courses are held in Via Pana 34/1, 48018 Faenza RA.
